www.vitalforceconsulting.com/events/

Seminar fees: \$400 for practitioners
\$350 for NAH students

Early Bird: Before March 1, 2010: Take \$25 off

At the door: Add \$50 to above price.

For Practitioners and students of Homeopathy, Mark your calendars for this once in a life time opportunity to study with a sensitive and intuitive practitioner who is best known in the world of Homeopathy for his valuable contributions in pediatric cases. Sunil has a wonderful presence that weaves through his cases and his teaching – he’s kind hearted, generous and sincere.

The seminar will focus on refinement in techniques in case-taking of children’s cases. Participants will be able to get insights into the recent advances in pediatric case taking especially in non-verbal infants. With the use of video cases, we will further explore and understand the basic concepts behind the homeopathic treatment of children. There will be a live case presentation to learn from Dr. Anand’s case taking. His use of casual tools such as toys in the clinic as well as the inquiry into doodles and drawings made by his children patients provide wonderful insights for his creative and gentle handling of even cases with deep pathology.

Dr. Sunil Anand

Dr. Sunil Anand has been closely associated with a dynamic group of homeopaths from Mumbai known as the ‘Mumbai group’. This group includes such well known homeopaths as Dr. Rajan Sankaran and Dr. Jayesh Shah. Along with his colleagues he conducts several training programs in refining case-taking techniques in homeopathy. They are part of a research group that teaches and updates their work and also offers quality education in homeopathy to students and doctors from all over the world. This organization is called Homeopathic Research and Charities.

Dr. Anand has recently become a faculty member of the Vancouver Homeopathic Academy where he is dean of Continuing Studies. He is especially interested in understanding childhood states of adults as a useful tool in prescribing and in the phenomena of transfer of states from either parent to the child. His contribution in the field of teaching homeopathy at an individual level at two prime medical colleges in Mumbai and Pune has helped shape his role as an endearing teacher.

He joined as a junior lecturer and over a period of fifteen years of teaching and conducting lectures for under-graduates as well as postgraduates, has risen to the designation of an Associate Professor. He has conducted specialized out-patient departments in pediatrics at both institutes and has been a very popular teacher.
