

Dr Rajan Sankaran's Video Course

Presented By Sujata Owens, President Minnesota Homeopathic Association

March 14 - March 16, 2008; June 27 - June 29, 2008; Sept 26 - Sept 28, 2008

This will be an unparalleled opportunity for those wishing to learn Dr. Rajan Sankaran's newest and most significant developments and breakthroughs in the practice of homeopathy.

The force behind the development of Rajan's ideas is the sense that homeopathy should have a clear, practical and cohesive method. Homeopaths have been going in so many different directions, such that in terms of results there has been a glaring inconsistency. Rajan's aim is to impart a clear, simple, accurate and reproducible system. His way of working — of case taking, analysis and prescribing provides a definitive pathway for practitioners to follow in order to get reliable and consistent results of a very high order. And most importantly, it can be taught, learned and replicated!

Whether this will be your first experience learning from Rajan, or even if you have studied with him for several years, you will return to your practice with a new vision, profound understanding and confidence.

The course consists primarily of viewing Rajan treating and managing live patients from initial consultation through follow-ups. Rajan designed the course to enable homeopaths to understand each and every facet of how he works. His extraordinary commentary and analysis is interspersed throughout the flow of each case. This allows the viewer to understand exactly how he is working and thinking each step along the way.

SANKARAN VIDEO COURSE is a very systematic, high level, intensive and innovative clinical training that includes:

|| Building the case on the chief complaint in order to consistently connect the disturbed vital force and the simillimum.

|| Using vital sensations to precisely identify the kingdom, subkingdom and source.

|| In-depth training in the application of his latest and most important development: the seven levels of experience, which provides a clear road map to case receiving, remedy and potency selection.

|| Delving deeper into newer levels of perception in order to develop the skills to listen and observe the actual vital sensations and energy patterns of our patients.

* Plant Kingdom: a deeper insight into the sensations of plant families.

* Animal Kingdom: exploring animal remedies and animal distinctiveness.

* Mineral Kingdom: the grid of the periodic table and its direct application to remedy selection.

* Miasms: a detailed framework and differentiation, utilizing Rajan's model.

All of this is exemplified with memorable video-cases and illustrative presentations, which make the training highly relevant and greatly useful for those who attend.

During one of the sessions, Dr. Sankaran has graciously agreed to participate in a live discussion via the Internet. First preference will be given to those attending all three sessions.
